the targets are everywhere:

Locating ~~israeli~~ war infrastructure and the profiteers of genocide in ~~australia~~

Why this document

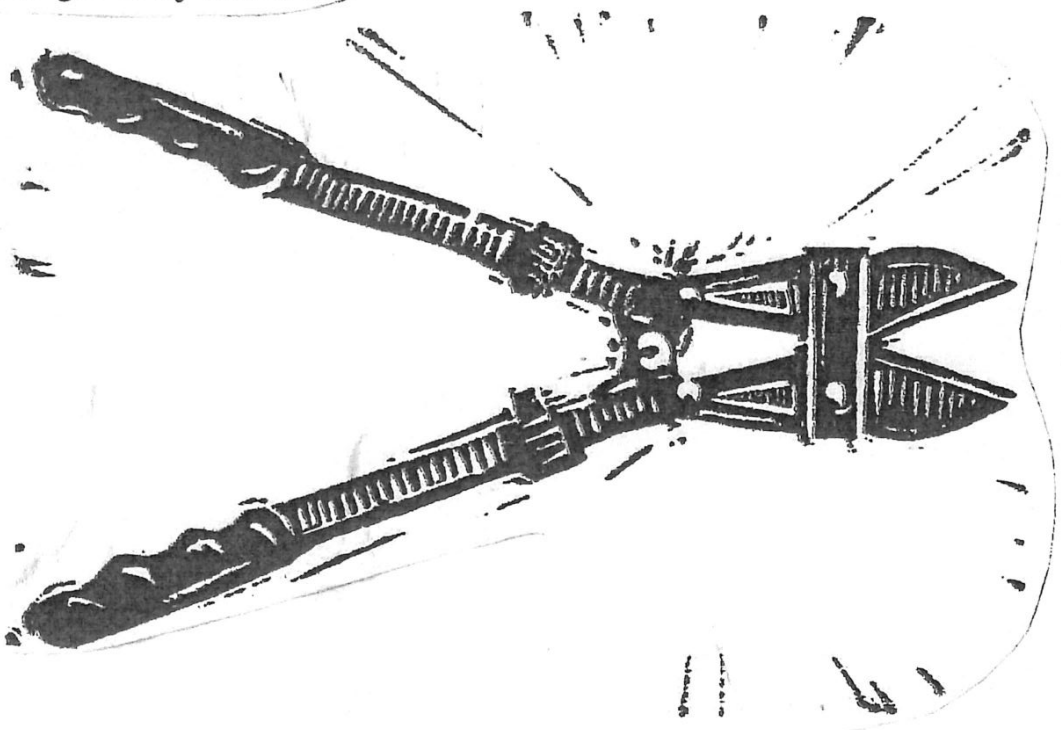
This document was written on Indigenous land in the illegitimate state of ~~australia~~. We acknowledge that this land was never ceded. Settler-colonialism in this continent is violent, ongoing and directly linked to ~~australia~~'s complicity in global colonialism and imperialism. All colonies must fall.

We aim to spotlight ~~australian~~ involvement in the occupation of Palestine by the ~~isreali~~ state. This document highlights some of the ~~australian~~ companies that manufacture and supply military hardware used by the zionist entity of ~~israel~~ in their genocide of Palestinians. ~~israeli~~ arms and the ~~isreali~~ occupation forces (IOF) use Palestine as a testing ground for weapons and surveillance technology, which is advertised as 'battle tested' and sold globally. This surveillance technology and military hardware is the largest export of the zionist state, and upholds their economy.

The ~~australian~~ government has provided over 350 military export permits since 2017, and more than 50 in 2023 alone. With these arms used to kill and maim thousands of Palestinians, these companies and the ~~australian~~ state are active participants in the Palestinian genocide. ~~australia~~ is particularly secretive about exports to ~~israel~~ and as such, it is difficult to find specific information on exports and supply chains. This document compiles a non-exhaustive list of companies in an attempt to unearth these links. Most, if not all of these companies, provide arms and munitions to multiple genocidal projects, including the genocide of West Papuans. In 2022, the Stockholm International Peace Research Institute (SIPRI) ranked ~~australia~~ the 15th largest exporter of arms globally.

A number of the companies listed contract with the ~~australian~~ offence force, including Lockheed Martin and Boeing.

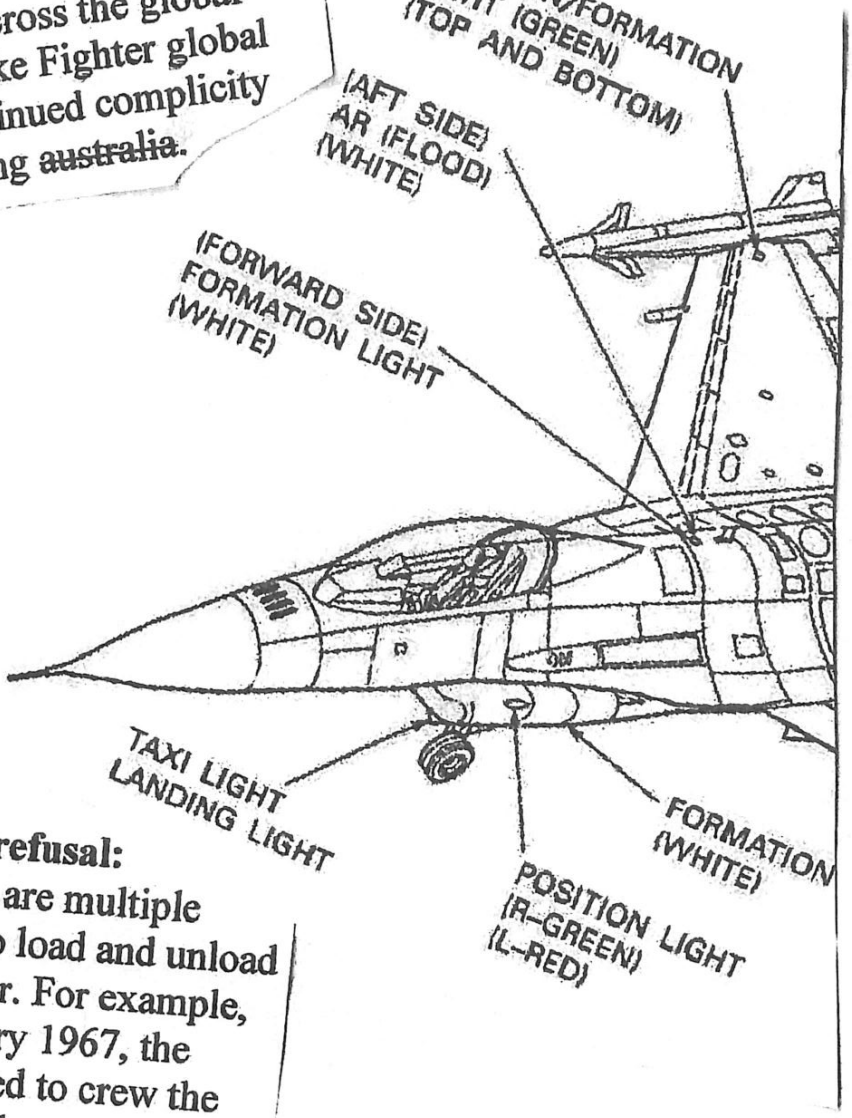
Other examples of companies that are complicit that may be of interest but not covered by the scope of this document include the recipient companies of gas licenses given by ~~israel~~ on Palestinian land.



Please note that the listed companies have multiple locations. This list is not exhaustive. The information was correct at time of print in March 2024, according to the sources cited. We also note that the addresses in this document are colonial place names.

Before you read further: F-35 production

F-35's are the preferred weapon of destruction for the IOF. In 2010, ~~israel~~ purchased its first F-35s through the ~~U.S.~~ government's Foreign Military Sales process. Three fleets became operational in 2017, 2020, and 2023 respectively, and the zionist army now has 75 F-35 aircrafts available. Their designer and producer, Lockheed Martin (LM), describes the jets as "the most lethal, survivable and connected fighter jet in the world". Since their inception, LM has aimed to decentralise production of the F-35, with parts being manufactured and stored across the global north. In this way, The Joint Strike Fighter global supply program ensures the continued complicity of each nation involved, including ~~australia~~.

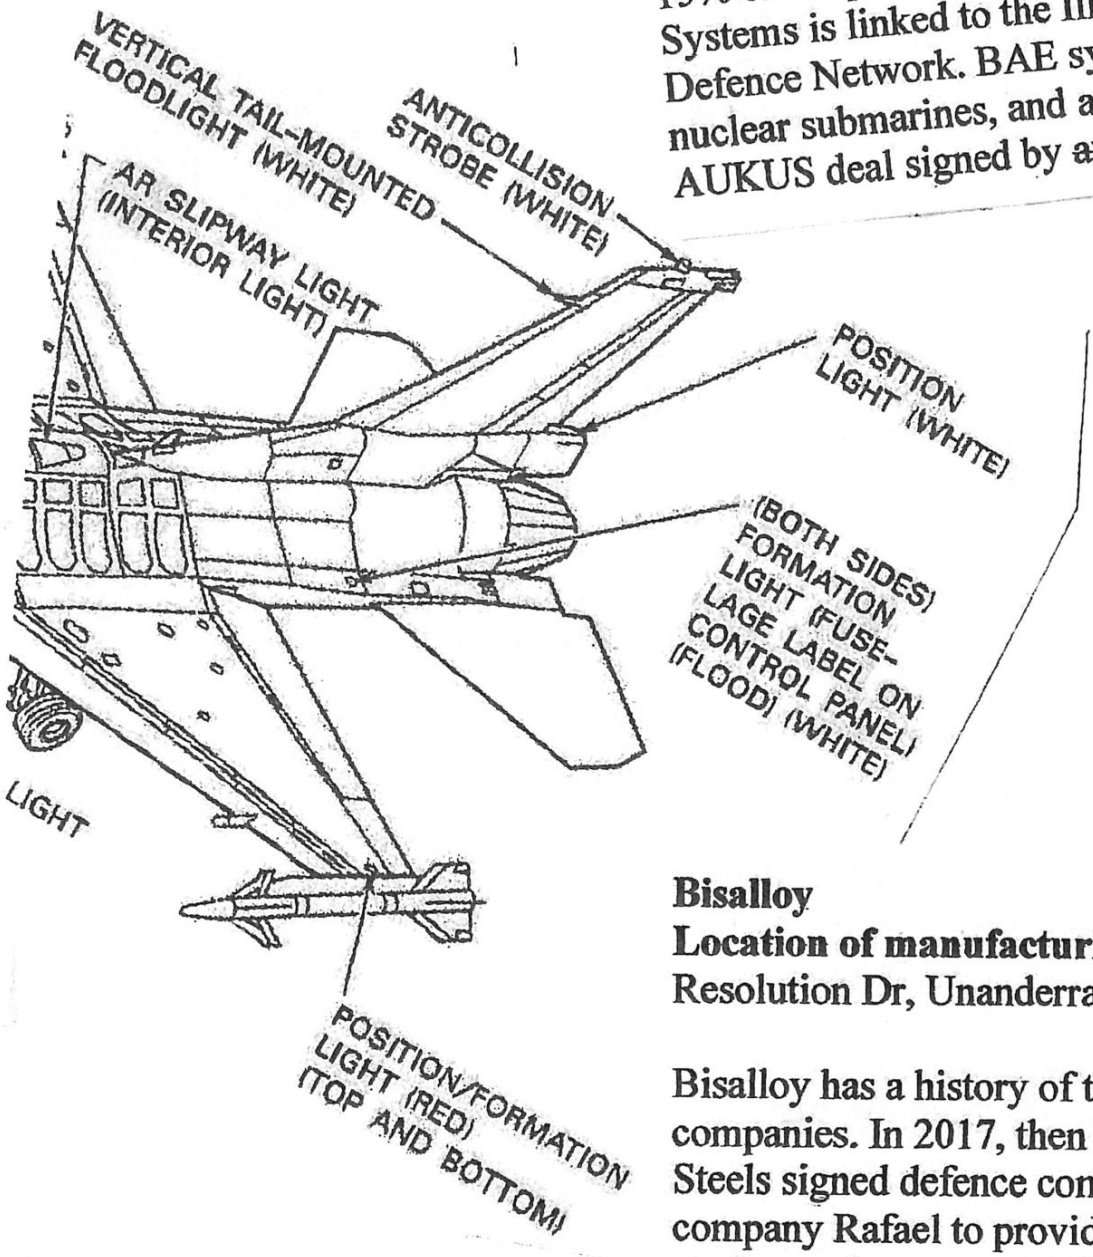


Historical examples of worker refusal:

During the war in Vietnam, there are multiple examples of dock staff refusing to load and unload materials that would aid in the war. For example, in May 1966, and again in February 1967, the Seamen's Union of ~~australia~~ refused to crew the M.V. Boonaroo, which had been chartered by the Federal Government to transport stores and equipment to Vietnam. Later in the war, rank and file members walked off the job without support of the union, refusing to be complicit in the war.

the targets are everywhere: Locating ~~israeli~~ war infrastructure and the profiteers of genocide in ~~australia~~

BAE Systems
Location of corporate office: 320 Pitt Street, Sydney, ~~nsw~~.
UK company BAE Systems supplies weapons systems and components to the IOF, including (but not limited to) manufacturing F-35 jets used by the IOF, and is suspected to also supply 155MM artillery shells, including white phosphorus munitions. BAE systems make 10-15% of the parts needed to build F-35 jets. BAE Systems is linked to the Illawarra and Shaolhaven Defence Network. BAE systems also build nuclear submarines, and are profitting from the AUKUS deal signed by ~~australia~~.



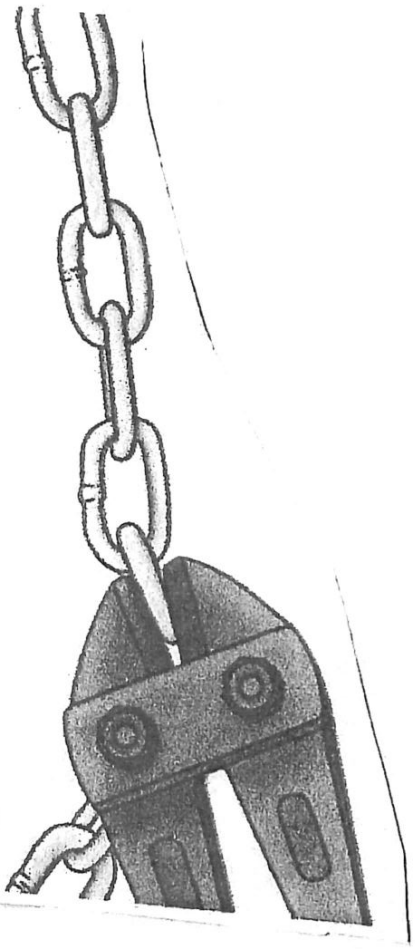
Bisalloy
Location of manufacturing and office: 18 Resolution Dr, Unanderra, ~~nsw~~.

Bisalloy has a history of trade with ~~isreali~~ military companies. In 2017, then later in 2019, Bisalloy Steels signed defence contracts with the ~~israeli~~ company Rafael to provide around 200 tonnes of steel to make armoured fighting vehicles.

Bisalloy also supply steel to Plasan - an ~~israeli~~ company who makes armoured cars used by the ~~israeli~~ government.

Bluescope Steel
Location of manufacturing and office: 1 Five Islands Rd, Port Kembla, ~~nsw~~.
Bluescope steel supplies directly to BAE Systems, as found in a 2023 report from the Illawarra Shoalhaven defence industry strategy.

Boeing
Location of ~~nsw~~ corporate headquarters: Level 10, Exchange House, 10 Bridge St, Sydney, ~~nsw~~.
Boeing is one of the world's largest arms companies. There are extensive documented weapons shipments by Boeing to ~~israel~~. New York Times reported on Oct 17, 2023, that Boeing was providing ~~israel~~ with guided bombs and gear that converts older bombs into precision-guided munitions.



Dickinson's Metallurgical Supplies
Location of headquarters: 12 - 13 Warrior Place, St Marys, ~~nsw~~.
Provides raw materials supply to its industry partners for the F-35 program.

Elbit Systems **Location:** Level 3, 42 Macquarie St. Barton, ~~act~~.

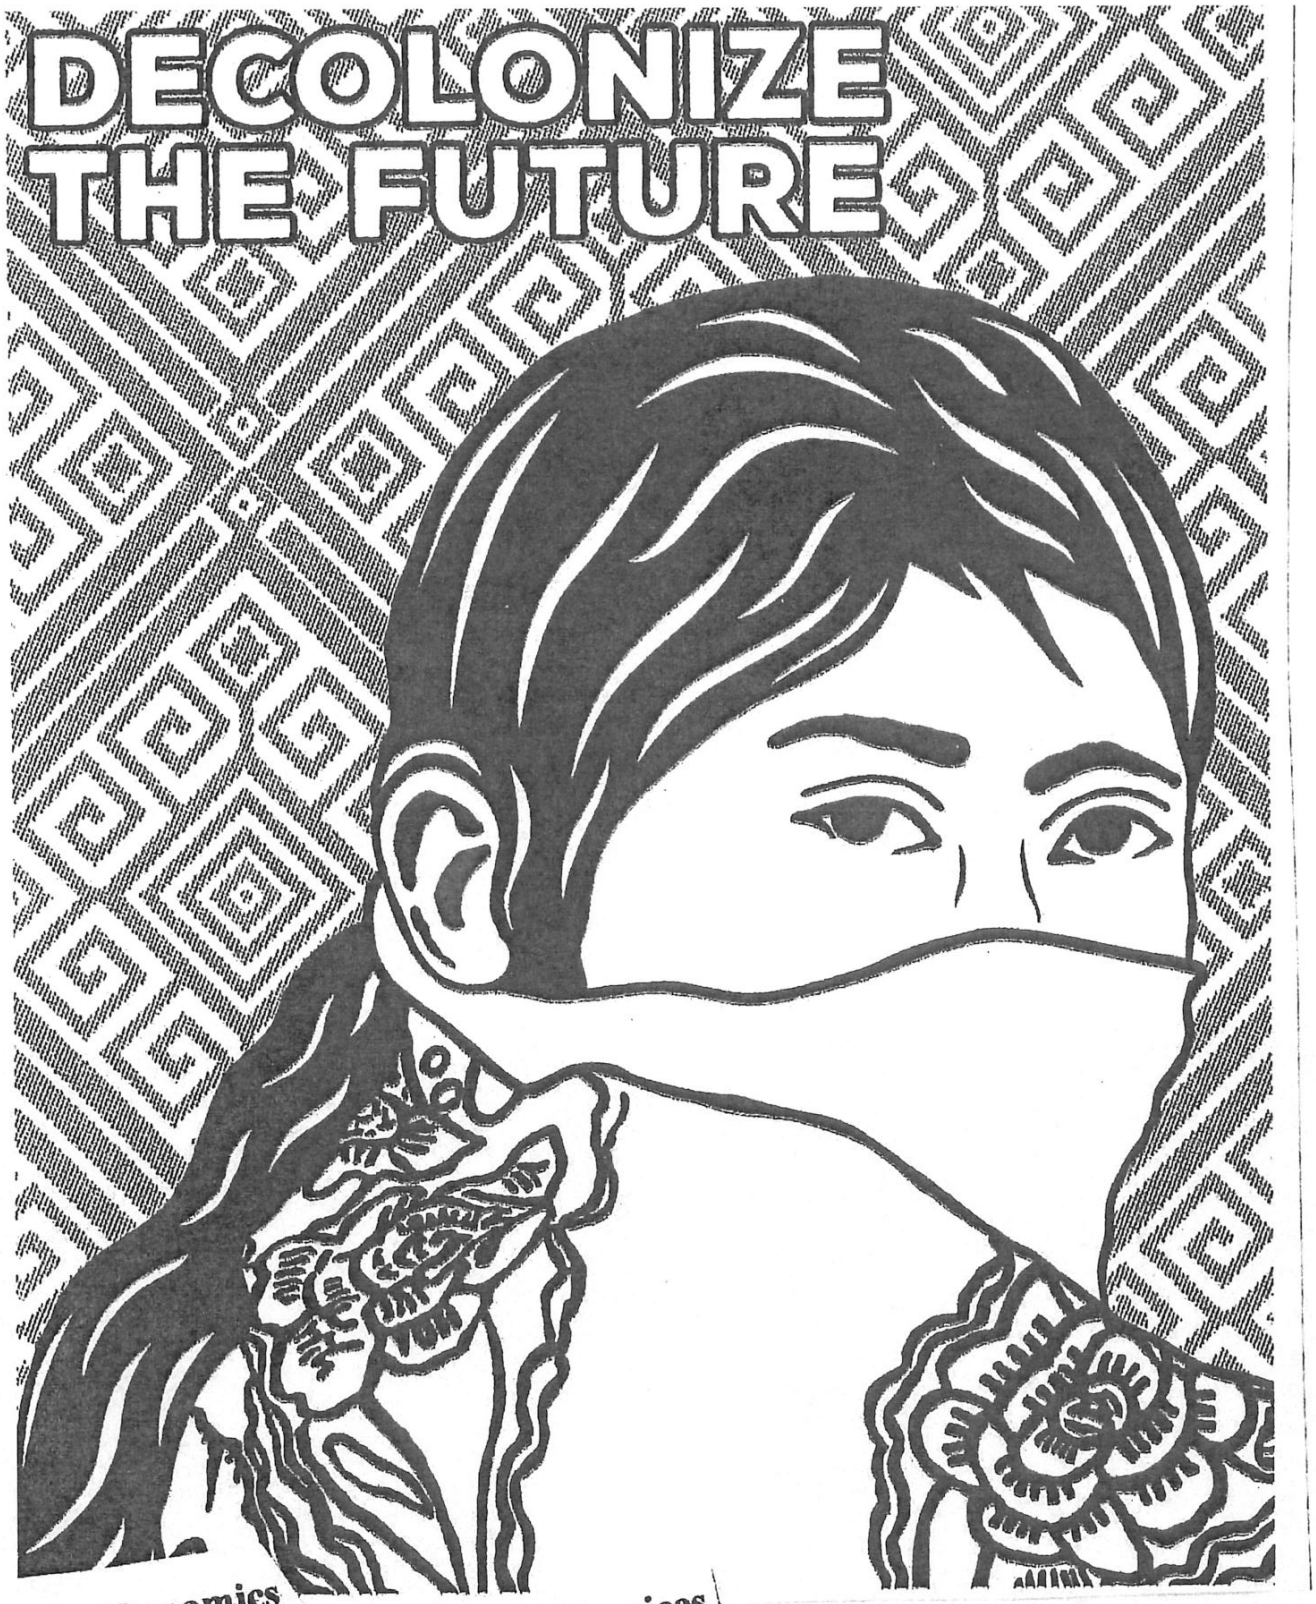
One of three major ~~israeli~~ offence industry companies contracted to provide the ~~australian defence force~~ with equipment and training. Elbit Systems is the prime systems integrator for the battle management system of the ~~australian army~~. Contracts with Elbit cover training, supply, installation of Hornet data recorders, tactical computer and components for LHD landing craft weapon systems (RWS), Battle Management system supplies, G Wagon Kit, BGC3 System.

In 2021 the ~~Victorian Government~~ announced a partnership with Elbit Systems. A government press release noted Elbit Systems for its "range of specialist technology systems and products that use artificial intelligence, sensors, data and networks in the areas of defence and homeland security."

Elbit Systems of ~~australia~~'s (ELSA) Centre of Excellence has teamed up with RMIT University and the ~~victorian government~~ to develop drone technology for civilian use.

Elbit, the maker of the Iron Sting, provides up to 85 percent of the land-based equipment procured by the ~~israeli military~~ and about 85 percent of its drones, according to Database of ~~israeli~~ Military and Security Export (DIMSE).

Ferra Engineering
Location: 344 New Cleveland Rd, Tingalpa, ~~qld~~.
Ferra Engineering in Brisbane is the exclusive manufacturer of the weapons adaptors for F-35 jets. These components are crucial for the release of munitions from the jet fighters.



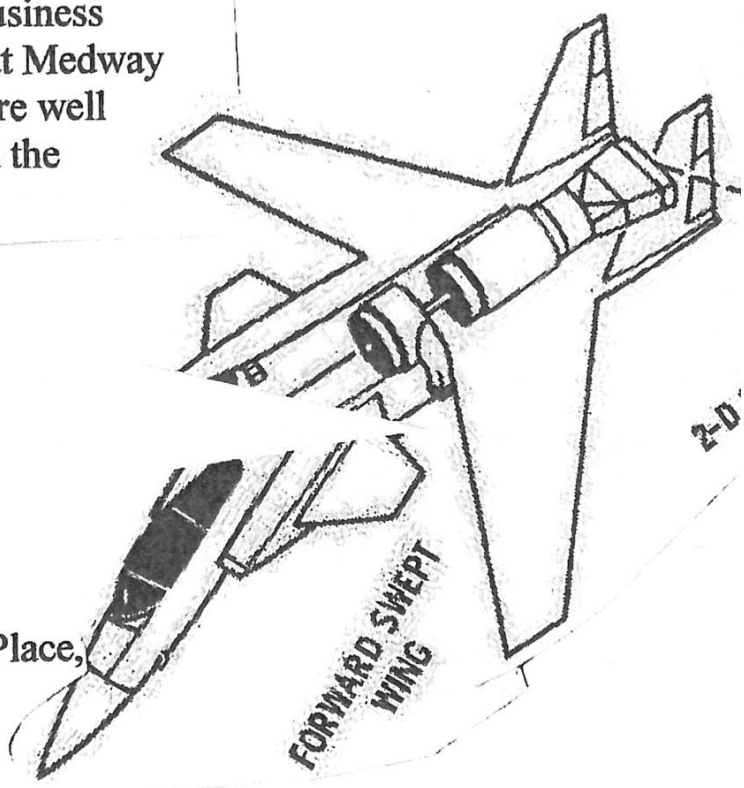
General Dynamics

Location General Dynamics Land Services manufacturing: 1a/50 Mawson Lakes Blvd, Mawson Lakes, ~~sa~~.

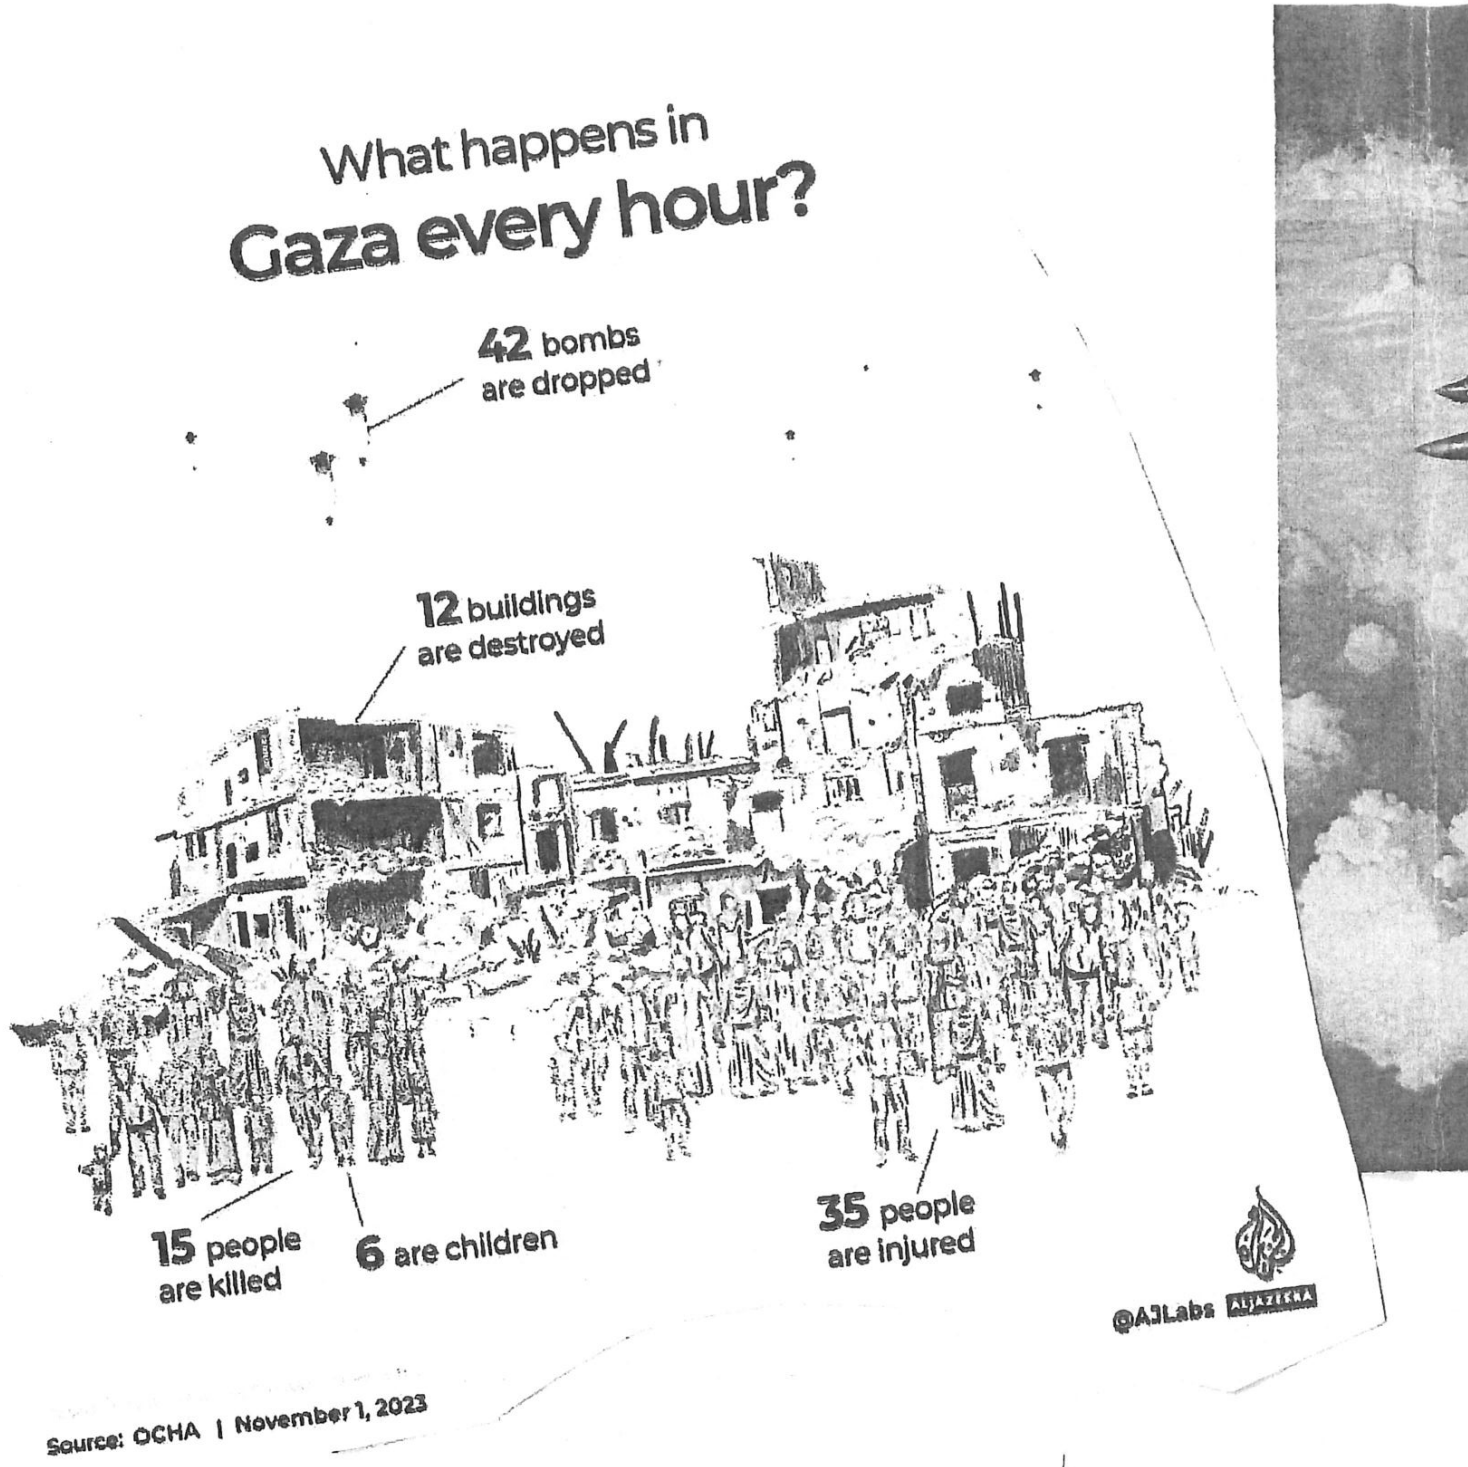
Location of General Dynamics Land Services corporate headquarters: 38500 Mound Road, Sterling Heights, ~~sa~~.

General Dynamics has extensive business with ~~israel~~, including providing 120mm-calibre tank rounds to the IOF, as well as MK-84 2,000 pound bombs. General Dynamics supply, upgrade and support the ~~australian~~ offence force's armoured fighting vehicle fleets.

Glyde Metal (Co-founders of Zenith Group)
Location: 65 Zenith Rd, Dandenong South, ~~vic~~.
Glyde Metal provide laser cutting, steel fabrication and coating (under Glyde Metal) and defence and space manufacturing under Zenith Group.
Glyde Metal's info can be found on Zenith group's website, along with their publicly accessed quad chart demonstrating such. Zenith is also a member of the '~~australian~~ Defence Alliance ~~victoria~~', which hosted representatives from BAE Systems and Thales Defence at the Business industry and Networking Day (BIN) at Medway golf club 2023, both companies that are well known for funding ~~israeli~~ warfare and the continued oppression of Palestinians.

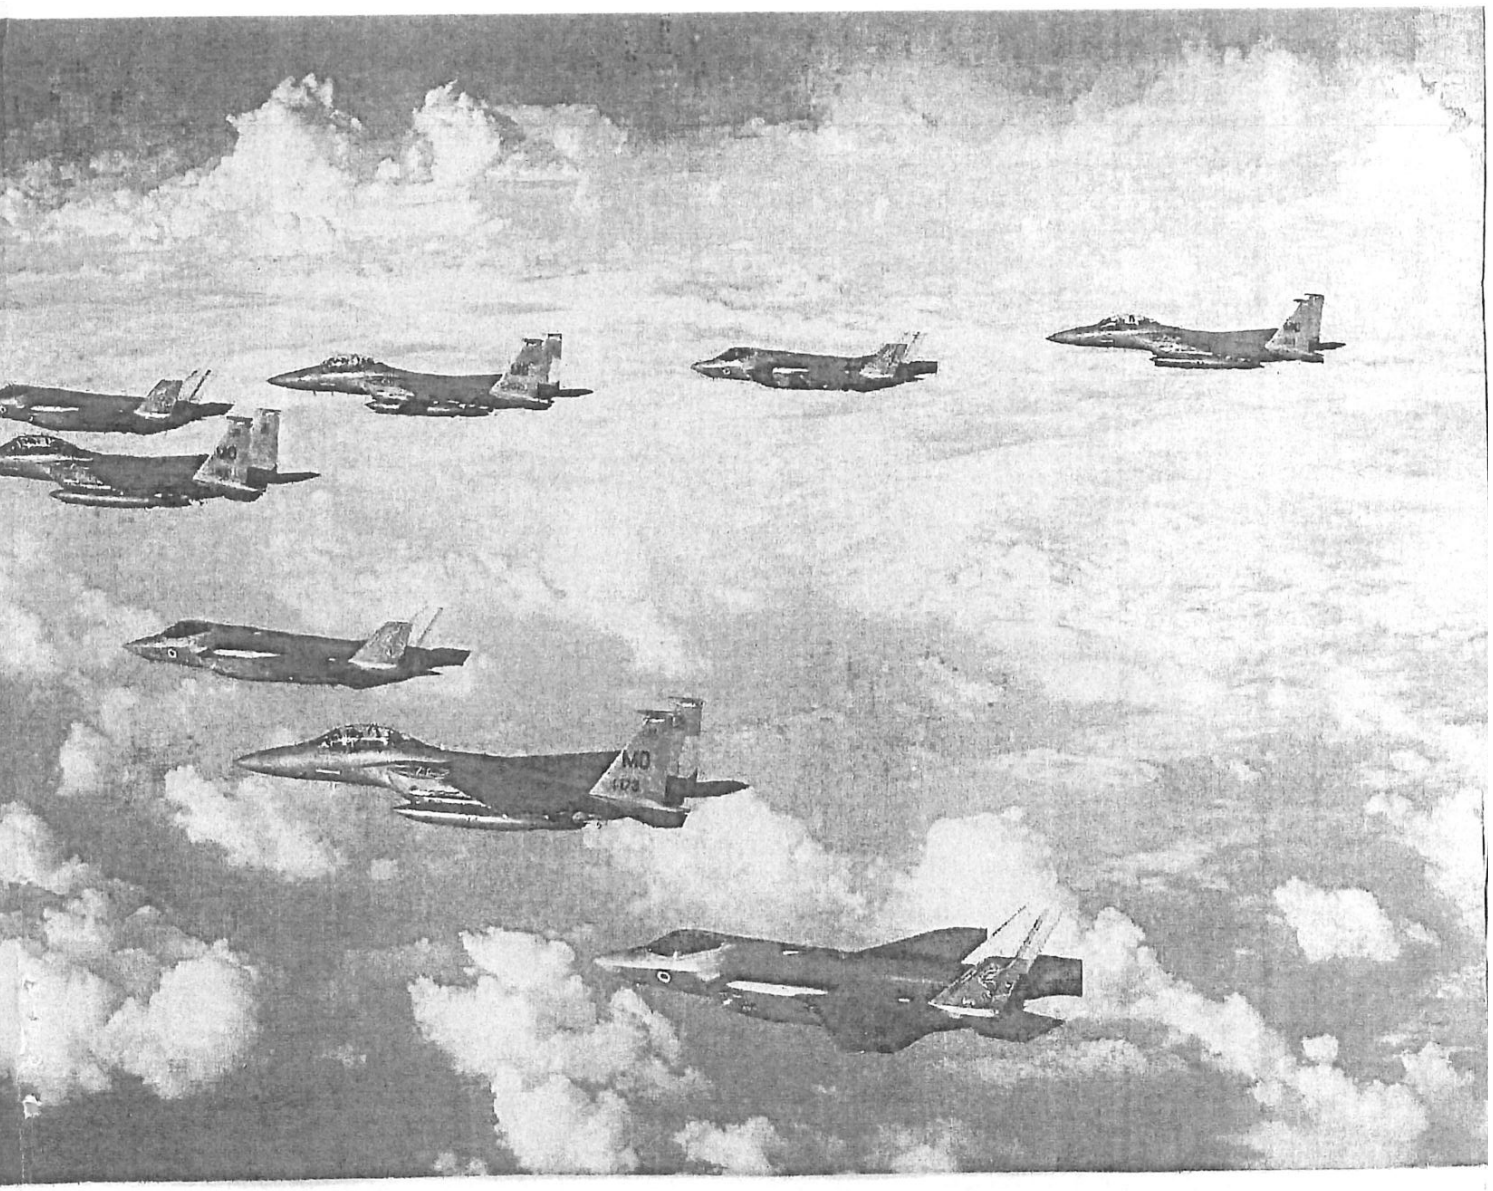


HIFraser Group
Location of Headquarters: 6/5 Vuko Place, Warriewood, ~~nsw~~.
5 facilities across ~~australia~~.
Email: sales@hifraser.com
HIFraser is part of the ~~australian~~ owned HIFraser Group, a combination of specialised engineering, manufacturing & instrumentation businesses. It produces and maintains niche safety critical gas and liquid systems and supplies ongoing repair and overhaul of ground support equipment. For the F-35, HIFraser has partnered with Lockheed Martin in the repair of air-to-air refuelling valves and fuel metering pumps, which allow the aircraft to refuel in midair. The company is working on components for every joint strike fighter; a fighter, strike and ground-attack aircraft that comes off the assembly line, not only those of the RAAF.
HIFraser is also partnering Lockheed Martin locally in the ongoing repair and overhaul of ground support equipment.



Heat Treatment ~~australia~~ (HTA)
Location: 43B Lara Way Campbellfield, ~~vic~~ 3061.
Location: 33 Cann Street Guildford, ~~nsw~~.
Location: 32 Gay Street, Coopers Plains, ~~qld.~~

Email: info@hta-global.com
HTA is the continent's largest heat treater. They provide heat treatment for components of F-35 Joint Strike Fighters, used by the ~~israeli~~ defence forces in their ongoing genocide of Palestinians in Gaza.



~~israel~~ Aerospace Industries
Location: Suite 1036, 1 Queens Road, Melbourne, ~~vic~~.
IAI is owned by the ~~israeli~~ government. They are one of three major ~~israeli~~ offence industry companies contracted to provide the ~~australian defence force~~ with equipment and training. IAI has continued to profit from the sale of munitions since October 2023.

Lintek
Location: Headquarters: 20 Bayldon Road, Queanbeyan, ~~nsw~~.
Using a patented high vacuum deposition process, Lintek manufactures a variety of printed circuit boards, ranging from 1.8-meter long antennas to sub miniature transmitters, using various substrates, for the phased array radar and electronic warfare systems of the F-35 program.

solidarity

with Palestine

Lockheed Martin

Location of office: Level 2, 195 Wellington Road, Clayton, ~~vic~~.

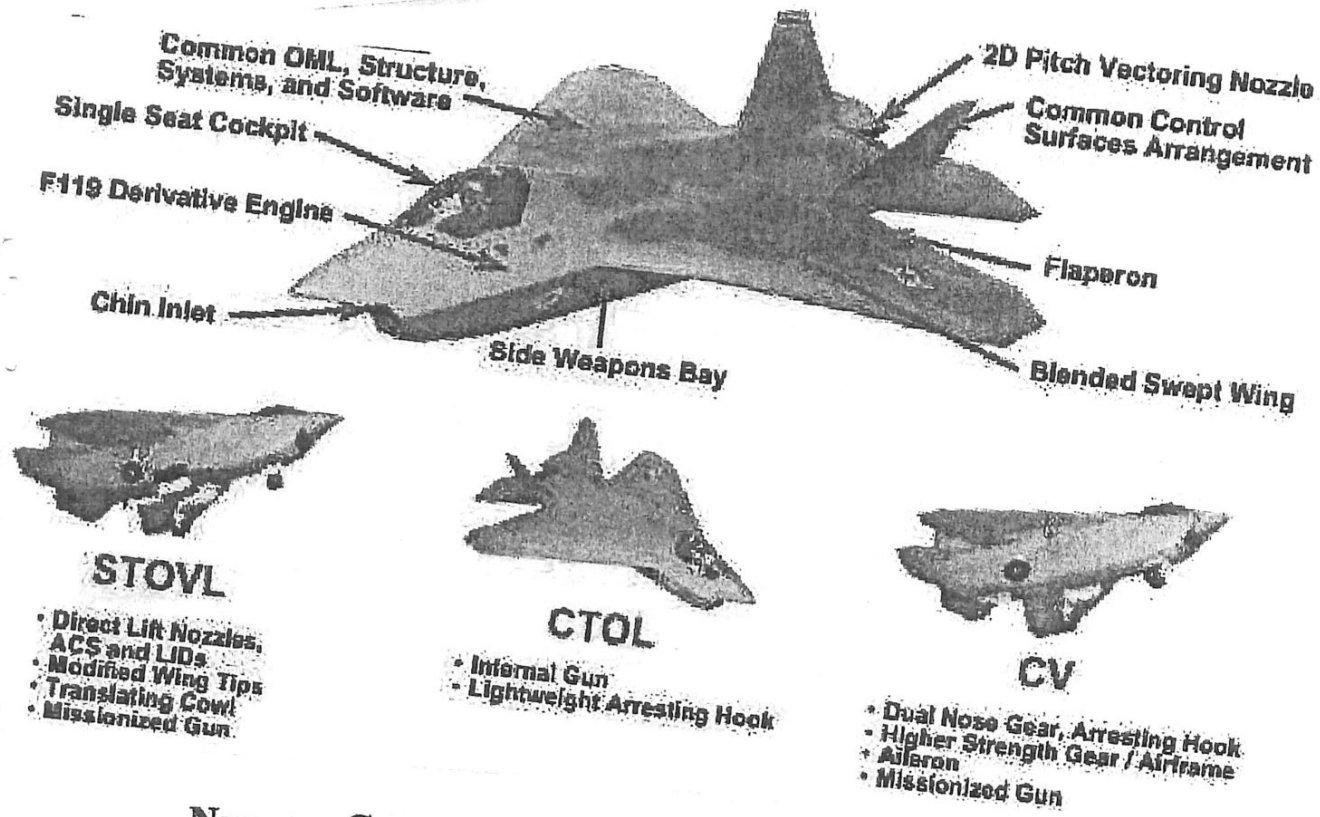
Location of corporate headquarters: 8 Brisbane Avenue, Barton, ~~act~~.

In 2022, Lockheed Martin was the world's largest arms-producing and military services company, with arms sales amounting to nearly 60 billion U.S. dollars. Arms sales constituted almost 90 percent of total company sales in that year. Unsurprisingly, Lockheed Martin supplies weapons to ~~israel~~, including F-35 fighter jets. From their own website, they are proud to have been supplying C-130 and F-16 aircrafts to the ~~israeli~~ air force since the 70s.

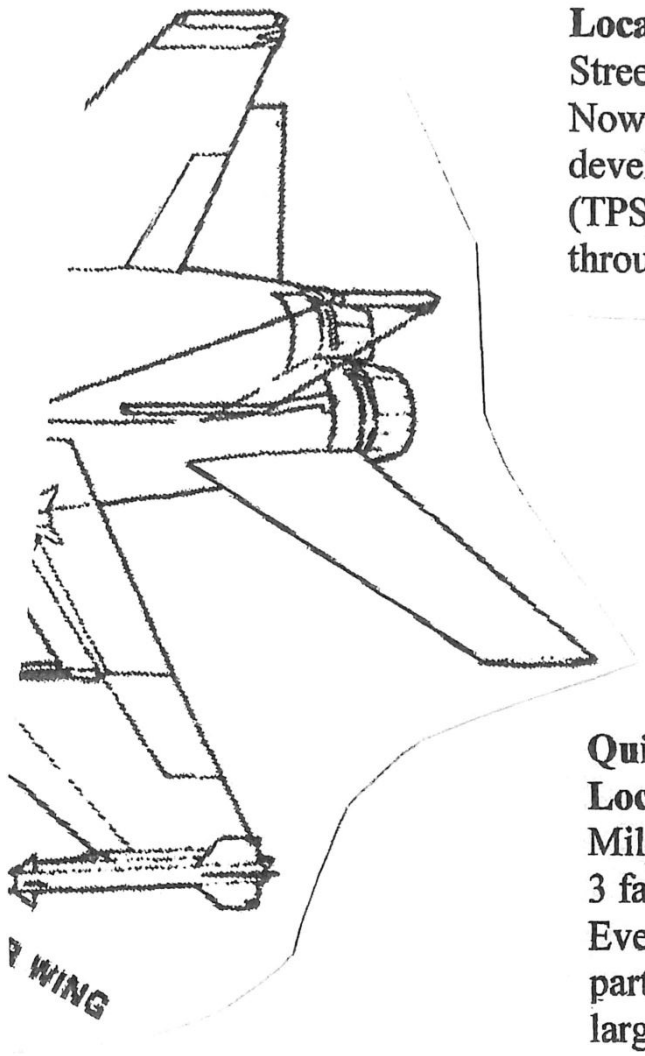
Marand
Location: 153 Keys Rd, Moorabbin, ~~vic~~.
Marand supply engineered products which are part of the production and development of parts for Lockheed Martin's F35 fighter jets. The final tail assembly of the F35 is exported to BAE Systems by Marand.
the world.

Northrop Grumman

Location of Corporate office: Unit 3/2 Faulding St, Symonston, ~~act~~.
Northrop Grumman supplies the IOF with weapons, including various missile systems, and their technology is integrated into the IOF's main weapons systems.



Nupress Group
Location of corporate headquarters: 11 Nelson Road, Cardiff, ~~nsw~~.
Signed a 7-year agreement with Pratt & Whitney in April 2019 to produce five components for the F-35 engines, including brackets, clamps, tubes and adaptors. The contract saw Nupress' role on the F-35 expanded, as the company already supplied F-35 canopy slings to the Varley Group.



Partech Systems
Location of corporate headquarters: 1 Garadi Street, Yerriyong, ~~nsw~~.
Now a subsidiary of 'Leonardo ~~australia~~', developed and delivers avionics test program sets (TPS) to support the F-35 program. 5 Locations throughout ~~australia~~.

Quickstep Holdings Limited
Locations of corporate headquarters: 361 Milperra Rd, Bankstown Aerodrome, ~~nsw~~.
3 facilities in ~~australia~~
Every F-35 made has Quickstep components as part of the aircraft. The company is ~~australia's~~ largest independent aerospace-grade advanced composite manufacturer. For the F-35 program, Quickstep is a key supplier to Northrop Grumman, providing 21 components for the F-35's fuselage, including doors, panels and skins. It also supplies Marand Precision Engineering with parts for the F-35 vertical tail, including skins, spars and fairings.
In December 2020, Quickstep delivered its 10,000th F-35 component, noting it was manufacturing more than 50 individual components and assemblies for Northrop Grumman, Marand and BAE Systems under the program.
Quickstep first became involved in the F-35 program in 2009, signing its first major agreement with Lockheed Martin and Northrop Grumman to manufacture F-35 composite doors and panels. Quickstep also signed an MOU with Marand and BAE Systems the same year. In 2014, Quickstep signed a long term agreement with Marand to produce composite parts for 700 sets of F-35 vertical tails.

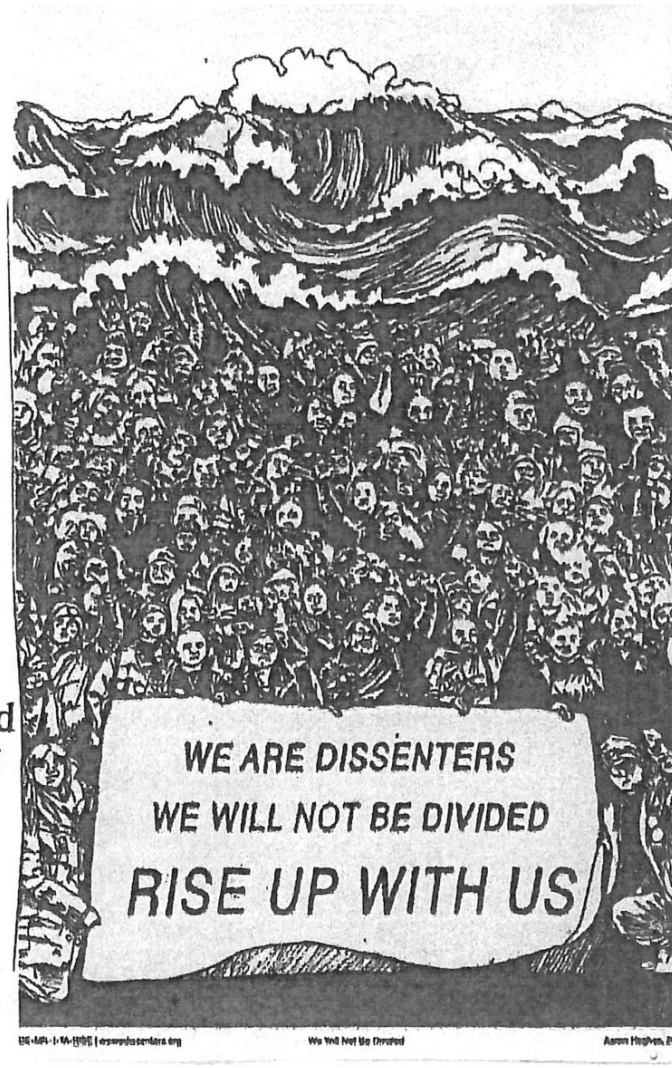
RFD ~~australia~~
Location of corporate headquarters: 2 Burilda Close, Wetherill Park, ~~nsw~~.
~~australian~~ division of **Survitec Group**, a larger company which has 11 manufacturing facilities and over 400 service centres, spanning 96 countries. RFD ~~australia~~ specialises in the supply and service of survival technology to the maritime, defence and government, aerospace, and energy sectors worldwide, including each F-35 pilot with Aircrew Flight Equipment (AFE).

Rockwell Collins ~~australia~~
Location of corporate headquarters: 8/12 Mars Rd Lane Cove West, ~~nsw~~.
8 locations in ~~australia.~~
A wholly-owned subsidiary of Collins Aerospace, a US subsidiary of the RTX corporation (formerly Raytheon Technologies). Manufactures the electro-optical (EO) assembly from the AAQ-37 Distributed Aperture System for the F-35.

Rosebank Engineering
Locations:
836 Mountain Hwy, Bayswater, ~~vic~~.
372 Cormack Road, Wingfield, sa.
26/34 Fraser Street Airport West, ~~vic~~.

Rosebank Engineering in Melbourne produces uplock actuators which are essential for the operation of the weapons bay doors.

Rosebank are also involved in the production and development of parts for Lockheed Martin's F35 fighter jets,(used by ~~usa~~ and ~~israel~~) one of the most highly advanced and sophisticated fighter jets in the world.

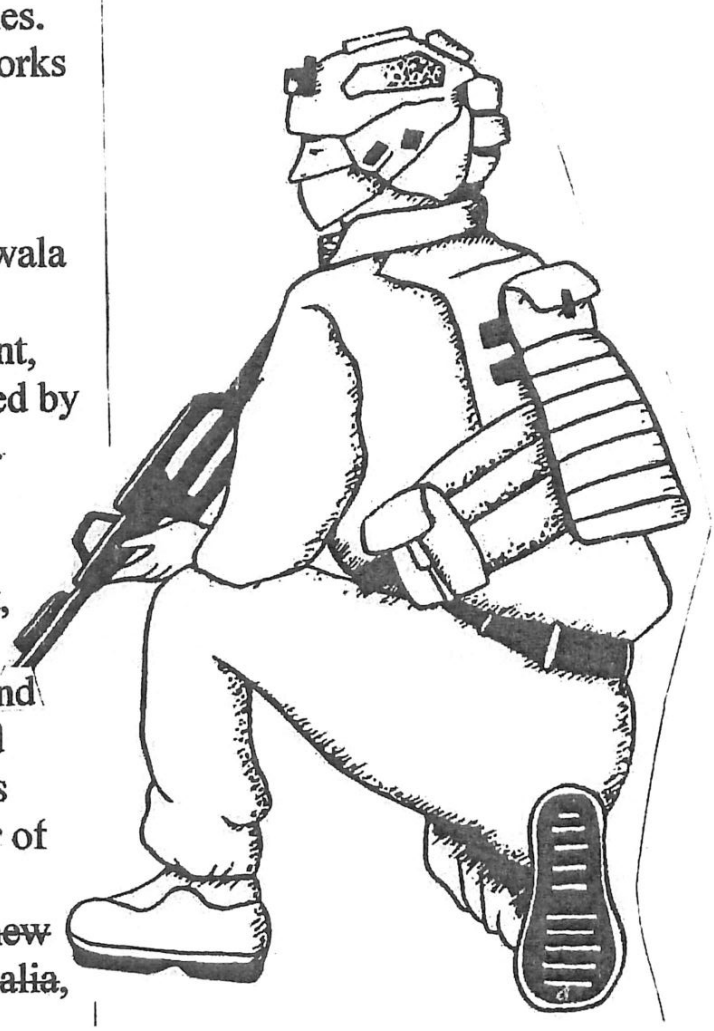


RTX (Raytheon)
Headquarters location: 4 Brindabella Cct, Brindabella Business Park HQ,~~act~~.
Location: Building C, 5 Talavera Road, Macquarie Park, ~~nsw.~~
Location: Albatross Aviation Technology Park, 39 Wugan Street, Yerriyong, ~~nsw~~.
Location: Building 368, Williamtown Raaf ~~nsw~~.

RTX / Raytheon has consistently supplied ~~israel~~ with weapons used against Gaza, including laser-guided bombs and multiple models of missiles including AGM-65 Maverick air-to-ground missiles, AIM-9X missiles, AIM-120 Sidewinder missiles, and TWO long-range missiles. Raytheon's technologies are also integrated into ~~israel's~~ main weapons systems, including fighter jets, military drones, and warships.

SMASH ~~australia~~
Location of office: Level 1, The Realm 18 National Circuit, Barton, ~~act~~.
SMASH ~~australia~~ is a subsidiary of Smartshooter, an ~~israeli~~ arms company. Smartshooter produces specialises in remote weapons stations and fire control systems, including remote-controlled gun turrets that can be affixed to military vessels as well as remote weapons with integrated radars. In September 2023,the Director of SMASH ~~australia~~ announced on Linkedin that the company is 'open for business'.

Thales
Location of head office: 7 Murray Rose Ave, Sydney Olympic Park, ~~nsw~~.
Small arms manufacturing location: 4 Martini Parade, Lithgow, ~~nsw~~.
Underwater research facility: 274 Victoria Rd, Rydalmere, ~~nsw~~.
Thales has partnerships with both ~~israeli~~ Aerospace Industries (IAI) and Elbit, with both partnerships producing weapons used by the IOF. This includes a guided missile and killer drones.
Thales is also partnered with Exclusive Networks ~~israel~~, who distribute products and services relating to data security and IT infrastructure.
Thales runs multiple ~~australian~~ government-owned munitions factories (Benalla and Mulwala plants).
Thales has at least 35 sites across the continent, including a newcastle location that is protected by adjacent police station and maritime security.



TR Calibration
Location of headquarters: 41 Enterprise Cct, Prestons, ~~nsw~~.
TR Calibration specialises in the calibration and repair of test and measurement equipment and instruments within ~~australia~~. TR Calibration is part of TR Group, ~~australia~~'s leading provider of technology solutions. Its customers include Raytheon ~~australia~~, ~~australian~~ offence force, ~~new zealand~~ Defence Force, Boeing Defence ~~australia~~, Airbus, BAE Systems, Lockheed Martin

Varley Group
Location of corporate headquarters: 21 School Drive, Tomago (Newcastle), ~~nsw~~.
9 facilities around ~~australia~~.
Involved in the F-35 program from 2003 during the System Development and Demonstration phase. The company has since been given numerous contracts to deliver specialised F-35 aircraft ground support equipment for all three F-35 variants. Varley works with both Lockheed Martin and Northrop Grumman on the program. It designed and manufactures the landing gear handling system and canopy maintenance sling assembly for Lockheed Martin, achieving the status of original equipment manufacturer (OEM) for these items. In 2008, Varley was also contracted by LM to design and develop a field use variant of the landing gear handling system in addition to the original variant used at military bases. In 2015, Varley signed a long term agreement with Lockheed Martin. For Northrop Grumman, from 2005, Varley designed and has manufactured the F-35's aircraft maintenance

Varley Rafael
Location: Based in the ~~nsw~~ Hunter region. May have a Naarm location based on their LinkedIn.
Email: info@vrasystems.com.au

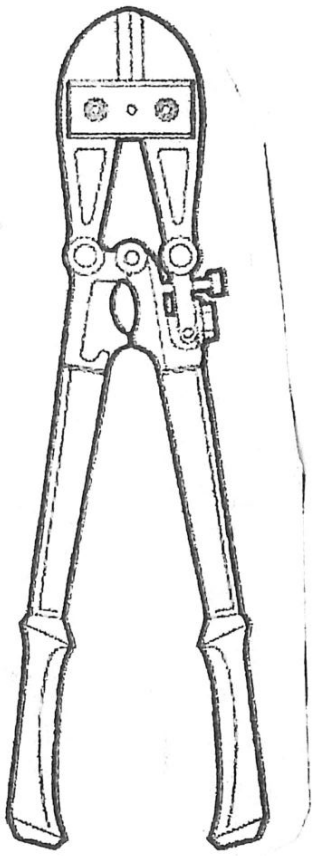
Rafael are the third largest ~~israeli~~ offence industry company, who are contracted to provide the ~~australian~~ offence force with equipment and training. Rafael delivers state-of-the-art defence innovations to ~~australia~~ through Varley Rafael ~~australia~~ (VRA) — a joint venture between The Varley Group, ~~australia's~~ oldest defence enterprise, and Rafael Advanced Defense Systems

Varley Group has set up a joint venture with ~~israeli~~ weapons company Rafael to make spike anti-tank missiles. This joint venture was set up in 2018 and is called Varley Rafael.

Varley Group's website states that the firm VRA "will deliver cutting edge ~~australian~~ produced and supported capabilities such as the SPIKE LR2 Anti-Tank Guided Weapon (ATGW)."

ZenithGroup (ZG)
Location: 65 Zenith Rd, Dandenong South, ~~vic.~~
(ZG) was established in 2020 by founders Campagno Engineering & Glyde Metal Industries. ZG seems to have a road in Dandenong South dedicated to its factories, including Campagno and Glyde.
Currently ZG is working with local and international companies and organisations including D.S.T Group (Defence science technology group), Swinburne University, Boeing, Ruag, R.D.A, Ferra, Rheinmetall (Majority stakeholder of BAE Systems) and many more, to provide them with defence manufacturing services, laser cutting and steel fabrication.
From Zenith website: "ZenithGroup are experienced manufacturers and suppliers within the defence and industrial supply chain and present a unique value proposition to Primes, Sub Primes, Tier 1 and Tier 2 enterprises.

Universities
Many universities have links with military companies, and are part of the pipeline to war. This document will not go into specific details on each university and their link to each company, however it is recommended that those interested in universities and their complicity in war investigate their local universities for ties to the above companies.



About us

We acknowledge that our existence as settlers is inextricably linked with the illegitimate structure of ~~australia~~.

We seek to reveal the chain links of the genocidal supply chain and remind readers that these connections are tangible and local.

In the words of Act for Freedom Now!: "We encourage people to make their own analyses of the military-industrial complex, its raw materials and its logistics, with no less than its efficient sabotage in mind [...] our ability to fight domination (and its wars) is irrevocably dependent on knowing its infrastructures, understanding the mechanisms that make them function and, not least, establishing the necessary skills and a certain routine for attacking identified vulnerabilities."

We offer our thanks to research done by people in BDS ~~australia~~ and union movements. More info on the BDS movement is available here: https://bdsaustralia.net.au/

Credit to Just Seeds for many of the artworks in this zine
